Purification of atactic polypropylene

Mitsui Toatsu Chemicals, Inc., Japan

Jpn. Kokai Tokkyo Koho, 3 pp.

CODEN: JKXXAF

Patent

Japanese

C08F010-06; C08F006-00

35-4 (Chemistry of Synthetic High Polymers)

N.CNT 1

	PATENT NO.	KIND	DATE	APPLICATION NO.	DATE

3	Atactic polypropylene (I) [9003-07-0] contg. relatively large amts. compds. (catalyst residues) is treated with >0.5 part hydrotalcite/pa at .gtoreq.100.degree. to remove Cl as infusible ppts. Thus, 100 g I contg. 1.2% Cl and 3 g hydrotalcite were stirred 30 min at 160.degree settled for 2 h to give a clear melt contg. 450 ppm Cl and 0.5% ash.				
r	polypropylene chlorine removal hydrotalcite; catalyst residue removal				
r	polypropylene				
	12304-65-3				
	RL: USES (Uses)				
	(chlorine removal by, from polypropylene)				
T	9003-07-0P				
	RL: PREP (Preparation)				
	(chlorine removal from, by hydrotalcite)
